

# PRO FUTURE™

## SAVINGS ON ALL SIDES

PRO FUTURE 

# SAVE ON THE **JOB** AND

Pro Future™ offers you savings on all sides. Considerably lighter than comparable products, a Pro Future hooklift equipped with our performance technologies offers you increased payload opportunities, faster operations, shorter standstills and more trips per day for reduced fuel consumption and lower carbon dioxide emissions.

Pro Future from MULTILIFT gives selected products and solutions better performance with less environmental impact. They have passed certain industry-leading criteria regarding energy efficiency, power source, emissions, noise pollution and recyclability. By investing in equipment with the Pro Future seal, you can improve sustainability in your operations while reducing your costs considerably.

**PRO FUTURE** 

## Experience ultimate performance

Always included in Pro Future products, our Performance Package makes operation faster, smoother, quieter and more fuel-efficient than ever.

### **Fast Performance™** increases your speed in operation

Fast lowering, fast tipping and fast speed functions give a significant productivity boost.

### **Sequence Performance™** gives you the flow

Automatic sequence control makes unloading and tipping faster and easier with just a single lever movement.

### **Quiet Performance™** saves your ears

Friction relief technology lifts the front body to eliminate vibration and noise.

# ON THE ROAD

## Savings on all sides

### ✓ Save time

Speed is the key to more profitable and sustainable operations. Pro Future's Fast Performance functions allow you to work significantly faster. By helping you get more done in less time using less energy, Pro Future raises the bar for operating efficiency – putting you at the top.

### ✓ Save money

Lighter, faster and smarter, a Pro Future hooklift can reduce your diesel consumption by up to 25-30%. Pro Future hooklifts are equipped with more energy-efficient hydraulics compared to average hooklifts with 20-tonne lifting capacity. That means your truck engine runs less for the same amount of work and uses less fuel.

### ✓ Save the environment

With its lighter dead weight, a Pro Future hooklift offers considerable reductions in CO<sub>2</sub> emissions right from the start. Also, as part of a regenerative system that requires no increase in engine RPM by the driver, you can lower emissions during active operation by up to 25-30%.

### ✓ Save your ears

Pollution is not just about CO<sub>2</sub>. Noise reduction is a high priority when, for example, handling waste in residential areas. With faster cycle times, lower engine RPMs and friction relief technology, you generate less noise during operation.

## MULTILIFT Pro Future™

Pro Future is available for a range of MULTILIFT models:

Pro Future™ model
MULTILIFT XR18S Pro Future™
MULTILIFT XR18Z Pro Future™
MULTILIFT XR24S Pro Future™*
MULTILIFT XR18SL Pro Future™
MULTILIFT XR21SL Pro Future™

\* Exclusively for the UK market

## The more you use it, the more you save

Our calculations show that emissions and fuel consumption during operation with Pro Future are cut by approximately 30% for an average operator, compared to a hooklift without these features. This means that if you use the hooklift 10 times a day and drive 100,000 km per year over eight years, you could save 10,000 euro.

*Calculations based on MULTILIFT XR18S – Pro Future™ on a 3-axle truck.*

# BUILT TO PERFORM

Hiab is the world's leading provider of on-road load handling equipment. Customer satisfaction is the first priority for us. Hiab's product range includes HIAB loader cranes, JONSERED recycling and forestry cranes, LOGLIFT forestry cranes, MOFFETT truck-mounted forklifts and MULTILIFT demountables, as well as DEL, WALTCO and ZEPRO tail lifts.
