

SAFETY FIRST

YOUR SAFETY IS OUR COMMITMENT

When it comes to keeping you and your surroundings safe at work there can be no compromises. This is one of the most important principles in Hiab.

For JONSERED recycling cranes we have developed two different safety systems adapted to your operational needs to make your work as safe and efficient as possible and at the same time pay only for what you need. You continue to work efficiently while we take care of your safety.

Benefits

- Stay safe with a safety system tailor made for your operational needs
- Very reliable safety systems based on Hiab quality and long experience
- A high quality safety system gives your crane a longer life
- Low risk of system damage and failure

TWO OPTIONS

How you work with heavy recyclables can vary. This means there can be different demands on how the equipment is specified both in terms of crane configuration and what control system is needed. Regardless of how you work it is important to stay productive and at the same time maintain a safe operation.

Therefore we have made two different safety systems for recycling cranes, each having operation specific features to ensure you get exactly what you need to ensure you work efficiently whilst staying safe. And best of all doing so knowing that you have only paid for exactly what you need.

What is the right option for you?

Selection guide:	Recycle application	
	Top seat operation	Remote control operation
Safety system (Machinery directive compliance EN12999)	Safety+R 	Safety+RS 
Controls	Top seat manual control	Top seat manual control Top seat remote control Platform prepared remote control
Hydraulic system	Fixed	Load Sensing (LS)
SPACE	No	Yes
External display	Yes	Yes
Emergency stop	Yes	Yes
Hour and cycle counter	Yes	Yes
Over load protection system	POL	OLP
Variable Stability Limit (VSL)	No	Option
High boom warning	Yes	Yes
Stabilizer extension warning	Yes	Yes
Stabilizer deployment monitoring	Yes	Yes
Rated capacity warning	Yes	Yes
Load Holding Valve (LHV)	Yes	Yes
Automatic dumping of oil (ADO)	No	Yes
Slope monitoring	Yes	Yes
Automatic Power Off (APO)	No	Yes
Pump Flow Distribution (PFD)	No	Yes
Automatic Speed Control (ASC)	No	Yes
Operator Protection System (OPS)	No	Yes
Available on crane models	JONSERED 1250RZ JONSERED 1500RZ JONSERED 1620RZ JONSERED 1300RS JONSERED 2490RS	All recycling crane models including top seat configuration
